Roller Blind Systems

From functional to fashionable – this is the way roller blinds have come over the years. Firstly appreciated for their excellent shading qualities, their unobtrusiveness and comfortable operation they have turned into a favourite of today's interior design. Their simple and clean lines are the perfect finish for modern architecture.

Whether very large or very small, Silent Gliss offers solutions for all window sizes.

A vast range of fabrics, textures and colours ensures a beautiful look for all rooms and intentions.

Roman Blind Systems

Great versatility is the main characteristic of Roman Blinds. Different styles and fabrics may create strong fashion statements or underline the atmosphere of a room – it's a matter of personal choice.

Whether relaxed softfolds, more disciplined hardfolds, beautiful reefs or stylish on poles – Silent Gliss has a top quality solution for all styles.

Fabric options are almost unlimited. Customer can chose from a vast range of textures, patterns and colours. Of course we may use customer's own material.

Panel Glide Systems

Inspired by the East – Panel Glides epitomise aesthetic and individual window and room decoration. Colours, patterns, fabrics from sheers to opaque – anything is possible.

Fabric effects are stunning but Silent Gliss has even more to offer: The unique folding panel combines the beauty of panels with a striking 3D-look when folded. Exceptional elegance is the main character of this window decoration.

Whatever the intention is: a pure design statement, a decorative and efficient shading measure or both - Silent Gliss offers a made to measure solution on highest quality and design levels.

A wide range of high quality panel fabrics is available.

Venetian Blind Systems

Elegant and flexible - Venetian blinds are a classy and unobtrusive window decoration. Light and glare can be perfectly managed through tilting the slats. Light management to the max. is possible through Silent Gliss' special punching method. Silent Gliss Venetian Blinds are available with different slat sizes and almost unlimited colour options that meet individual desires and highest quality expectation.

Hand and Cord Operated Systems

Hand and Cord drawn curtains are naturally elegant and leave a pure impression of fabric. Their great versatility lies in unlimited fabric, pattern and colour options.

Smooth, reliable and nearly soundless operation are the hallmarks of Silent Gliss curtain tracks. There are no limits to sizes and angles.

The Silent Gliss 1080 tracks is also used as a discreet and reliable picture hanging system, eliminating the need for holes in interior walls.

Electric Curtain Track Systems

Large windows and glazed areas are more popular than ever. For these types of windows or for difficult-to-reach windows are motorised curtain tracks the perfect solution.

Whether made for private homes, hotels, museums or other buildings Silent Gliss systems can be individually operated, arranged in groups or just as well be included into building management systems. Customers may chose from a range of operation alternatives according to their individual requirements and desires.

Vertical Blind Systems

Precision light, glare and privacy management can be as simple as pulling a chain or pressing a button. Vertical Blinds are most flexible systems that can accommodate virtually any application - regardless whether straight, curved or sloping. To serve all window shapes and sizes Silent Gliss systems are made to measure. The wide selection of fabrics ranges from design driven textures to special requirement fabrics.

Pleated Blind Systems

Pleated Blinds combine simplicity and elegance with great versatility. They may be an inspiring window fashion or an unobtrusive shading measure of pared-down elegance.

The enormous range of shape and stacking possibilities make them ideal for windows of all shapes and dimensions.

An extensive range of colours and the choice of single and double fabrics guarantees the best look for all intentions.

Decorative Curtain Poles

Curtain Poles are a decorative and individual suspension that may create stunning effects. The Silent Gliss Metropole range combines both the beautiful look of pole suspension and the functional advantages of curtain tracks - by using gliders that run inside the pole. Stylish and beautifully crafted finals and accessories underline or stress the design statement of the chosen curtains or blinds. Silent Gliss' wide range of colours includes basic colours such as black and white and several gold, silver and other metal effects.

Skylight Shading Systems

Large glass areas are one of the architectural passions nowadays. Intelligent shading solutions for conservatories, domes, atriums and other glazed areas an absolute necessity.

Silent Gliss Wintergarden Systems are guided Roman Blinds systems. Superior hardware and virtually any fabric guarantee shading tuned to individual needs and desires.

The Silent Gliss Skylight system is a worldwide unique systems. The parallel movable fabric panels provide an innovative and very elegant way of shading. Maximal light and glare management is guaranteed through gradual tilting of the fabric panels.

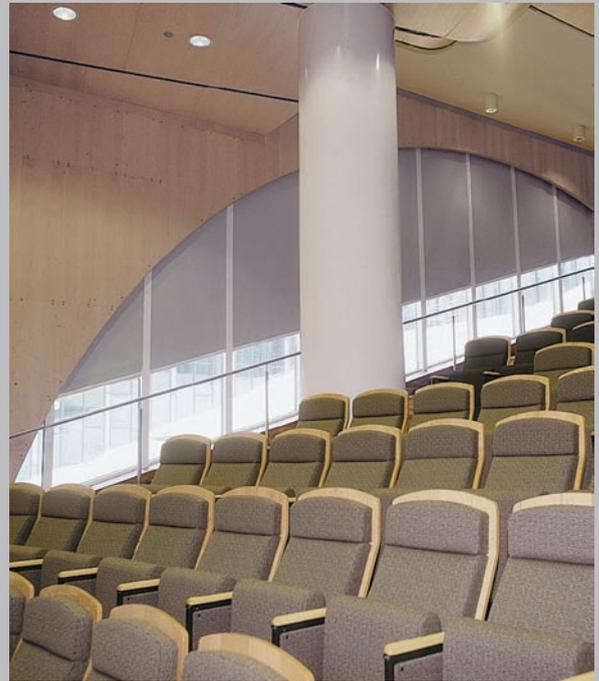

Dim-Out Blind Systems

Offices, schools, laboratories, private homes -
Wherever a maximum of light exclusion is needed
Dim Out Blinds are the solution.

Silent Gliss systems combine high functionality and
reliability with discreet look resulting from different
size headboxes.

All Dim Out fabrics are sealed and riveted. Most
fabrics are flame retarded.

Room Divider / Cubicle Track Systems

Cubicle Tracks are the most efficient way of dividing room into separate private areas. They are most commonly used in hospital environments and for shower applications.

The Silent Gliss Cubicle tracks are the most widely specified and installed systems in Europe. Technically advanced systems with many safety and hygiene features guarantee durable and reliable operation.
