

Roman Blind Systems
Silent Gliss 2320 / Silent Gliss 2330

Design, Elegance & Functionality

The manually equalent Silent Gliss systems 2320 / 2330 are remarkably elegant Roman blind systems with a precision mechanism concealed in a discreet and unobtrusive profile.

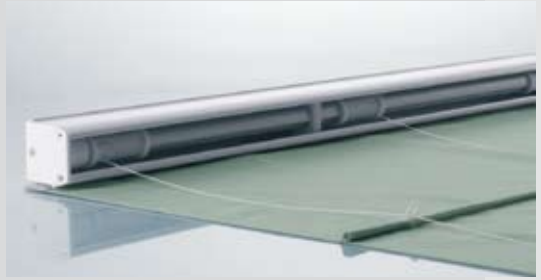

Silent Gliss has developed a unique cord release mechanism that allows detaching and re-fixing of cords within seconds. Furthermore, cords do not need to be separated from the fabric for cleaning as the cord release pins guarantee that they stay in place during the cleaning process.

This new mechanism and the reliable Velcro tape make the maintenance of these Roman blind systems even more effortless than ever before.

Design and Function – a winning combination for Silent Gliss.

Easy cleaning. Cords stay in place after cleaning thanks to the cord release pin.

The mechanism is concealed in an unobtrusive cassette.

The system 2330 is produced with an optimised gear drive and is used for fabrics heavier than 2.5kg (4:1 ratio).
