

Roller Blind System Silent Gliss 4860

Silent Gliss Roller Blind Systems

The Silent Gliss Advantage

Silent Gliss offers the most comprehensive and technically advanced roller blind range available. The clean lines of our roller blinds complement modern architecture and interior design perfectly. They allow maximum shading with minimum window obstruction.

Quality and warranty

The materials of our roller blinds are rust free and UV resistant for sustained functionality and appearance over time. All systems are tested with more than 10'000 cycles. This is why we can give a 5-year warranty.

Precision

Experienced specialists assemble every roller blind manually to guarantee perfect roll on and roll off of the fabric – day after day!

Size

Whether bigger is better or small is sublime, our range offers the perfect solution for every need.

Operating comfort

Spring operated, with elegant metal chain or electric motor, our systems offer comfort at the highest level. Experience the Silent Gliss difference.

Easy installation and maintenance

Easy installation and maintenance in every situation.

The Appearance

Compact design

The compact and elegant design enables maximum coverage without loss of space for installation and has a minimal light gap in side by side applications.

Elegant finish

Classic metal design brackets offer a sophisticated finish to enhance and add value to every roller blind system.

Metallic design

The optional design brackets combined with the matching headrail profile, bottom bar and end caps offer an elegant, coordinated and timeless look.

Manually Operated Roller Blind Systems

Spring operated systems

Built in speed regulator for controlled fabric speed and stop controller to allow the roller blind to be stopped in any position.

Chain operated systems

Whatever your requirement regarding size or fabric weight, our various models provide the perfect solution. All our roller blinds use a high precision chain drive for smooth operation.

The combination (Silent Gliss 4810 DF)

This unique roller blind is operated with a chain and a spring – all in one. The blind can be lowered with the chain, then closed by a slight pull on the bottom bar.

Electrically Operated Roller Blind Systems

The ultimate choice for comfort and automation for domestic or commercial purposes.

Variety of models

We offer a variety of models to suit all your requirements. We can find the most efficient model dependant on blind size, weight and desired control method.

Silent Gliss tubular motors

The Silent Gliss motors guarantee smooth, reliable and silent operation of every roller blind. Integrated radio receiver, easy programming mode, soft stop and intermediate stop are all convenient additions.

Silent Gliss remote controls

All electric operated Silent Gliss systems can be operated with the Silent Gliss remote control system 9940.

From the easy one system controller up to the sophisticated programmable multi channel solution, you can choose what you need. Light sensors are also available giving you yet another option and allowing your system to be controlled by daylight.

Further Options and Advantages

Side-by-side installation

This option allows operation of two roller blinds together (one motor for two blinds).

Double bracket

The double bracket offers the possibility to combine two roller blinds at an optimum distance allowing the required space for flawless operation.

Side Guided

For sloped situations and roller blinds exposed to wind or heavy ventilation, the side guided option avoids unwanted movement of the fabric.

Special solutions

If there is a situation for which a standard system is not suitable, our specialists may never the less have a solution.

Overview of Systems and Options

Operation	Dimensions			Features / Options							Fitting Options			System		
				Double Function	Stop Controller available	Connected Systems (one Drive)	Side by Side	Side Guides available	Metal brackets	Design Case available	Fascia Cover available	Corazza available	Ceiling Fix		Wall Fix	Recess Fix

The Fabrics

The Fabric is as important as the hardware when it comes to the quality of a roller blind. Only technically advanced and perfectly produced fabrics guarantee crease free roll on and off.

Silent Gliss fabric collection

A wide range of fabric styles and colors can be found in the Silent Gliss collection. By choosing one of these specially tested fabrics you can be assured of a perfect blind.

Most of our fabrics are eco-tex certified and fire retardant. We provide solar, heat and acoustic coefficients so that you know exactly what to expect in terms of light, glare and heat control of your room/building.

Digital printing

Why not have your own design on your roller blinds? With modern digital printing we can realise your ideas whatever they may be.

Screen fabrics

Available in different styles and designs, with aluminium backing and various openness factors (transparencies), our wide range of screen fabrics are optimised for perfect hanging even for larger sized roller blinds.

Colorama fabrics

Available in two transparencies and more than 40 colours, this state of the art fabric brings all the technical characteristics needed, while looking very decorative and soft.

Silent Gliss is the leading global supplier of motorised and manual curtain and blind systems in the high quality market. We offer our customers the very best in terms of quality, design, technology, service and individuality. Our core competence is innovation - inspired and driven by customer needs. A team of highly skilled and experienced professionals works on new developments as well as on the improvement of existing products. With committed customer support teams Silent Gliss provides an extensive range of services including technical advice, fitting services and maintenance all around the world.
