Swiss engineered

The Range

Metropolitan systems have max. profile length of 6m.
Customer can choose between profile diameters of 23mm or 30mm.

Operating Methods

All systems are operated manually either by hand or by cord.

Our Materials

We offer aluminium profiles, which are available in different colours and wood effects.
Finishes and Accessories can be selected from a wide range of forms, materials and colours.

Special Features

Systems 1003 and 6120 can be bent to tight radius.
System 2010 (Pole Cascade): The hardware is attached to the fabric and therefore invisible.

Silent Gliss Plus

Silent Gliss systems are precision engineered. They work smooth and balanced.

All Metropole systems work with gliders and can be bent.
We offer systems for curtains and roman blinds.

All Curtain Pole systems are made to measure and come with 3years guarantee.

Obliging and reliable service is a matter of course.
